This month's ASM Chapter Meeting will be held at the Progress Energy Metallurgy Laboratory in New Hill, North Carolina on January 17, 2008. The Metallurgy Laboratory is located in the Harris Visitors Center off of NC State Road 1127. The meeting will consist of an overview presentation of the Metallurgy Lab capabilities followed by a tour/demonstration of the laboratory areas.

The Metallurgy Laboratory conducts failure analyses, material characterization analyses, and corrosion evaluations/testing for Progress Energy (generating plants, transmission & distribution, and other internal organizations). The laboratory employs four engineers and a technician, and has a variety of state of the art analytical instrumentation.

The meeting will start at about 6:30 and will last about 2 hours. Dinner will be included. If you plan to attend, please contact me or register at the chapter website by Monday January 14, 2008.

Directions to the Harris Visitors Center from Raleigh: take Highway 1 South to the New Hill exit (Exit 89?), take a left after stopping at the end of the exit ramp, and drive about 1.25 miles to the Harris Visitors Center. Please use the parking lot in the front of the building. Due to the security features of this building, you will need to call Danny Brinkley (x3392), Ahmad Moccari (x3438), or Frank Watson (x3329) to enter the building.

Progress Energy is a Fortune 250 diversified energy company with more than 24,000 megawatts of generation capacity and \$9 billion in annual revenues. The company's holdings include two electric utilities serving more than 2.8 million customers in North Carolina, South Carolina and Florida.

I will attend

If you plan to attend, please RSVP by no later than Jan 14 by clicking the link above to send an email to the officers or contacting one of the officers listed.

Next Meeting: Feb 15
