

The Office for Diversity and African American Affairs (ODAAA) is charged with helping create a model diverse and inclusive campus where everyone is welcome and empowered to achieve their goals and where intellectual and human diversity both stimulates and enhances innovation in action.

The ODAAA does two things to achieve its purpose. First, it collaborates with students, faculty and staff to promote programs and activities which recognize, celebrate and respect the unique experiences and contributions of every individual in the campus community. Second, the ODAAA collaborates with students, faculty and staff to promote programs and activities that encourage effective interaction between and among the diverse members of our campus community.

To enable and facilitate these two important objectives, the ODAAA also promotes programs and activities that increase diversity awareness, education and sensitivity. In addition, ODAAA seeks to increase the demographic, experiential, and intellectual diversity on our campus.

Diversity Support For Faculty Research Grants

WE CAN HELP FACULTY WITH GRANT PROPOSAL PREPARATION AND GRANT IMPLEMENTATION

Many proposals for large research training and education grants require scientists to address how their training and education proposal will increase the participation of women and other historically underrepresented groups in their disciplines.

We can help you prepare the diversity component of your grant proposal and help administer the diversity component of your research grant.

GRANT SERVICES WE PROVIDE

PROPOSAL PREPARATION

- Help integrate diversity into the grant proposal and provide information about campus diversity efforts
- Write letters of support or serve as co-PIs when appropriate and relevant to the research or grant objectives
- Help connect student training and education efforts and the grant diversity plan to campus diversity goals and resources

GRANT IMPLEMENTATION

- We can facilitate student recruitment
- Promote student socialization and engagement
- Conduct diversity workshops
- Assist with assessment and evaluation of diversity outcomes related to a grant

DIVERSITY RESEARCH

We can also assist faculty who are interested in conducting diversity-related research. For example, we can

- Identify diversity topics and research questions that serve the needs of NCSU
- Assist with development and writing of the diversity research plan
- Search for diversity grant programs and research funding
