

Security Report
November 10, 2004
Jeff Webster

The Security Subcommittee met on October 21st, next meeting is Dec 16th. We discussed where the committee should be focusing efforts. Getting information out to campus is the current goal. To that end we formed two working groups, education and communications, to focus on the information and its distribution.

Discussion of Outstanding Issues

HR Orientation

The HR sessions are going well. The handout is now available online (<http://www.ncsu.edu/it/education/schedule/downloads.html> in the Other category). Sarah Noell is working on a modified version of this material that will be available as a standalone course.

Anti-Virus

There were concerns about the meaning of the word 'enable' in the anti-virus regulation. The committee discussed possible clarifications and we have requested from legal the process needed to make a change.

New Efforts

The education and communications working groups both met on Wednesday November 3rd. Both groups had good initial meetings where the basic problems were discussed and next step targets were decided. More information will be provided in the next report.
