Electrical and Computer Engineers Unveil Senior Design Projects

The Department of Electrical and Computer Engineering at North Carolina State University will host Senior Design Day on Thursday, Dec. 2, from 10:30 a.m. to 3 p.m. in the Talley Student Center on the NC State campus.

About 150 electrical and computer engineering students will showcase projects from their senior design project course. Project topics include robotics, cellular and wireless communication devices, aids for disabled children, medical technologies, and network and World Wide Web applications.

Media coverage of the event is invited. The Talley Student Center is located on Cates Avenue near the intersection with Morrill Drive.

The culmination of electrical and computer engineering students' education at NC State, Senior Design Day calls on students to employ their engineering skills in designing solutions to real-world problems.
