

**EU-US Transatlantic Masters Degree Program in Forest Resources
(EU-US TMDPFR)**

By Dr. Bronson P. Bullock

The transatlantic Masters degree program in Forest Resources will train graduate students in managing, protecting, utilizing and improving forest and natural resources. This will be a top education, delivering knowledge and skills pertinent for today's increasingly globalized forestry. 24 EU and 24 US students will spend a semester each at the two EU universities in Sweden and Finland; and then one year in the USA, either in North Carolina or Michigan. Students will be offered to choose from a wide range of disciplines in forestry and obtain dual masters degrees. The total time for each student to complete the Masters degree will be two years. Instruction will be in English for all courses, though opportunities for foreign language instruction will be available for students when they are studying abroad. Students will be able to choose from a wide range of research topics related to forest resources and will obtain two MSc degrees at the completion of their program.

Partners: Swedish University of Agricultural Sciences (SLU), Alnarp, Sweden; University of Helsinki (UH), Helsinki, Finland; Michigan Technological University (MTU), Houghton, Michigan, USA.
