

Green Building Design and Construction: The LEED Implementation Process

Presented by the U.S. Green Building Council

This workshop is intended for professionals who are familiar with the LEED for New Construction or LEED for Core & Shell Rating System, but new to implementing it on projects or looking to brush up on implementation best practices. It is also appropriate for those pursuing GBCI's LEED AP Building Design + Construction credential – and complimentary, discounted exam preparation and practice test resources will be available in summer 2009 for workshop participants pursuing the LEED credential.

An official USGBC LEED Faculty member will walk the class through the phases of a typical project, including key decisions that project teams must make and guidance on how to make them. Throughout the day, you will engage with other participants in interactive activities that use case examples to enable you to work hands-on with the LEED Rating System. A few days prior to the workshop, registered participants will receive short case studies to review in preparation of the course. These case examples will provide the basis of the morning discussion and set the stage for rest of the day.

Participants receive exclusive online access to the reference guide, and the rating system is available for free at www.usgbc.org.

WHO SHOULD ATTEND?

Building industry professionals seeking to increase their understanding of the LEED for New Construction and Core & Shell Rating Systems and green building strategies, benefits and resources, including:

- Architects
- Designers
- Consultants
- Owners
- Engineers
- Developers
- Contractors
- Manufacturers

To make the most of this workshop, you should have the following prior knowledge: Experience with building design and construction practices and high-level competency with the LEED for New Construction and/or LEED Core & Shell Rating System and the LEED Reference Guide for Green Building Design and Construction, 2009 Edition.

LEARNING LEVEL

This is a 300-level course. The 200-level *LEED Core Concepts and Strategies* course is strongly recommended as preparation.

CONTINUING EDUCATION CREDITS
