TIPS:

✓ **Why use the Wish List?**

To save time spent searching for classes during your enrollment time. If you can save the classes you find in advance, you can skip the search step and go straight to adding as soon as your enrollment window opens.

NOTE: You may still need to search for classes if you saved classes are no longer available (either section closed or you do not meet restrictions) but Wish List will take care of adding any saved classes that are still open and available after just a few quick clicks.

✓ **Remember class prerequisites and restrictions!**

Make sure you plan and save classes according to class prerequisites and restrictions. If you try to save classes for which you do not meet the requirements, you will not be able to successfully enroll in these courses and you will have to search again.

✓ **Be realistic!**

Remember your academic level (FR, SO, JR, SR) and the courses you will be more likely to enroll in for the upcoming semester. If you're unsure, go ahead and try to save what you want but be prepared to search for more classes if they are full by your enrollment date.

✓ **Be prepared!**

Again, be prepared to search for more classes in case the Wish List is unable to enroll you into certain ones. Saving in your cart in advance does not guarantee a seat will still be available by your enrollment date but it is a great time-saver if your saved classes are available to you.
