

**THINK BRAZIL!!**  
Two amazing weeks

A cooperative project of  
SCI-LINK at North Carolina State University, Raleigh NC &  
Sangari Institute, Sao Paulo Brazil

**SAO PAULO**

Study a megalopolis with all its pluses and minuses  
An intense, urban experience in the world's third largest city  
Delve into Brazilian culture with paulanistos (Sao Paulo natives) as your guides  
Discover how the country's educational system faces challenges similar to our own  
Explore the vivid, colorful flower market,  
the Butanta Institute (producer of anti-venom)  
Investigate the remarkable history of different cultures,  
people and visit architectural treasures

**PANTANAL**

Immerse yourself in a unique ecosystem  
The world's largest wetlands with some of the  
globes' most diverse animals and plants  
More than 450 bird species, stunning toucans, and  
the endangered brilliant blue macaw  
Rivers inhabited by giant river otters, caiman, piranhas and anacondas  
View jaguar, tapir, giant anteaters and many kinds of monkeys including howlers  
Explore calcareous rock formations, natural swimming pools and waterfalls

This is a tour of self-discovery and interaction between  
U.S. and Brazilian educators traveling together.  
An opportunity for remarkable international comparisons  
between educational systems and ecosystems.  
Focus on science literacy, education and the environment with the experts.  
Field studies and classroom applications emphasized.  
Develop ways to share experiences with your students.
