

Download a file from the Web

1. There are two methods for downloading files from the Internet to your computer:

- | | |
|--|--|
| <p>A.</p> <ul style="list-style-type: none"> <input type="checkbox"/> hold the mouse button down (for PC, use the right button) on the desired link <input type="checkbox"/> choose Save this Link As.. from the pop up menu <input type="checkbox"/> click on Desktop or select the folder or directory you wish to save in, <input type="checkbox"/> change Format to "Source" <input type="checkbox"/> click on Save | <p>B.</p> <ul style="list-style-type: none"> <input type="checkbox"/> click on the desired link and let the program unpack itself on your computer <input type="checkbox"/> Mac files will generally be packed as .hqx and Windows files may be packed as .zip <input type="checkbox"/> You will need Stuffit Expander (Mac) or WinZip to work with packed files. |
|--|--|

These methods can be used for obtaining graphic images, video clips, and audio files.

Graphics:

- place the cursor over the image
- hold the mouse button down (for PC, use the right button)
- proceed as in method A above
- files will generally be labeled as .gif or .jpg
- files can be viewed with JPEG Viewer or LView Pro

Video:

- follow method A or B above
- files will generally be labeled as .qt, .mov, or .mpg
- files can be viewed with Sparkle or QuickTime for Windows

Audio:

- follow method A or B above
- files will generally be labeled as .wav, .au, or .mpg
- many video players will also handle audio

To look for programs to add to the function of your browser, go to the page Common Internet File Formats, <http://www.matisse.net/files/formats.html>

2. For practice, start on the page of Texas Instruments' Calculator Program Archive, <http://www.ti.com/calc/docs/arch.htm>

- Use the mouse to scroll down until you see the heading "Calculator Program Utilities" and "TI Graph-Link" below it.
- Click once on "TI Graph-Link". A new page should appear.

3. Look for the area on the left which reads “Download Graph Link For: TI-82 TI-83 TI-85 TI-86 TI-92”.
 - Click on TI-83. A new page should appear.

4. Macintosh:
 - Hold the mouse button down on “Macintosh TI-Graph Link for the TI-83 v1.0.3”. Release on “Save this Link as...”
 - Click on Desktop. Change the Format to “Source”, and notice the file name, link83.hqx. Click on Save.
 - After a Saving message, link83.hqx should appear on your desktop (you may have to move your browser window to see it).
 - Double click on the link83.hqx icon. Decoding and Extracting should follow. A folder called TI-Graph Link should be on your desktop with the programs in it.
 - You can put link83.hqx and the icon with blue arrows on it in the the Trash.
 - If these events do not happen as described, you probably do not have Stuffit Expander installed on your computer.

5. Windows:
 - Use the right mouse button to click on “Windows TI-Graph Link for the TI-83 v1.4” and choose Save this link as.
 - Choose the your desired drive and directory to save it and change Format to Source. Press Enter.
 - Double-clicking on setup83.exe will begin an installation program (you may have to look for it in the File Manager or My Computer).
 - Follow the directions in the installation program. If you choose all the defaults, you should end up with a group for TI-Graph Link which contains the program.
