THINK GREEN

(AND ORANGE)

Summer 2010

Discover the mountains this summer — join educators from other countries as you explore a world of rugged peaks, and shady trails. Learn about local environmental topics with global significance.

Climb to high altitudes for a mountain adventure. Stretch your mind, extend your reach, then share new experiences with your students.

PLAN NOW FOR AN AMAZING WEEK!

- Research scientists share their expertise and passion — air quality, mountain ecosystems, salamanders, birds, plants, GIS, and more.
- Field work, environmental monitoring, visit Grandfather Mountain, an international U.N. Biosphere site and home to 47 rare and endangered species.
- Learn about the culture of Appalachian Mountain people.
- Work with international educators
- Develop curriculum that provides cutting-edge information.
- Housing, dining, computer facilities, evening activities at Lees-McRae College
- Focus on STEM initiatives

This is a week of educational discovery in the environmentally rich setting of western North Carolina.

Space is limited.
Reserve your spot now.
Plan for a thrilling,
high-altitude summer experience.
