

What is Grants.gov?

Grants.gov is a new electronic portal that allows users to find, apply, and manage federal grant opportunities. Grants.gov simplifies the grants management process and creates a centralized, online process to find application forms, and apply for, over 900 grant programs from the 26 Federal grant-making agencies.

How soon must I use Grants.gov?

Eventually, all federal grant-making agencies will require grant submission via Grants.gov. NIH will soon require all competing research grant applications to be submitted electronically via the web portal of Grants.gov on a new SF 424 Research and Related (R&R) application.
