

## How Amendment 1 Would Impact North Carolina

- In 1996 the NC General Assembly passed a law prohibiting same-sex marriage. This amendment does not redefine marriage but rather writes discrimination into our state's constitution and is not necessary since there is already a law in place.
- Uses broad language that would ban civil unions, domestic partnerships, or legal recognition of other relationships (same-sex OR opposite-sex).
- Would negate benefits for thousands of NC municipal employees and our UNC system.
- Could invalidate domestic violence protections for unmarried couples whether same-sex or opposite-sex.
- Hundreds of small and large businesses statewide, including numerous CEOs, are opposed because of the potential negative impact in our state and for their companies.
- Researchers have found in states with constitutional amendments GLBT individuals report an increase in stress, anxiety, and substance abuse.
