Trees:

No live trees are permitted on campus. Artificial trees are permitted.
May not be kept in a corridor, within three feet of a doorway or near a heat source.
May not conceal or obstruct any evacuation routes, fire alarm pull stations, fire extinguishers, emergency egress lights, exit signs, smoke detectors and sprinkler heads.

Must be composed of a non-flammable material or be treated with flame-retardant solution.

Holiday Lights:

LED-type lights preferred because use a lower voltage and do not produce heat.
Must be UL (Underwriter’s Laboratories) listed and approved.
Do not run wiring through doorways, under carpeting or through holes in the wall.
Do not use extension cords. We recommend surge protectors, plugged directly into outlet.
Do not link more than three strands of lights together.
Always turn lights off when leaving the building or before going to sleep.

Decorations:

May not conceal or obstruct any evacuation routes, fire alarm pull stations, fire extinguishers, emergency egress lights, exit signs, smoke detectors and sprinkler heads.
Must be composed of a non-flammable material or be treated with flame-retardant solution.

A few more reminders!

Candles and incense are not permitted on campus. However, you may use wax warmers or wickless candles (ex: Scentsy) as long as they are turned off before leaving or going to sleep.
Do not decorate the corridors with wrapping paper.
All decorations must be removed before leaving for Winter Break.

Happy Holidays from the NC State University Fire Marshal’s Office !!!
