REPORT PROCESSING & DATA ISSUES

This report provides descriptive statistics on the IUCRC Process Outcome Questionnaires. Data were collected during the Fall of 2010 and refer to the Center activity for FY 2009-2010.

Since most evaluators use this report to benchmark their Center compared to a program-wide “norm”, we have reported “Center-level” means and standard deviations, with the exception of question #5 on the Industry Questionnaire (see below). That is, means (unweighted) for each center were used to calculate a Center-level mean. Because questions that require a numeric answer (e.g. number of dollars) often have highly skewed distributions, we also reported the medians for these variables. For forced choice questions, frequencies and standard deviations for individual respondents were also reported.

Industry Questionnaires

All data were collected using a single industry questionnaire form; the short and long versions of industry questionnaires used in past data collection are no longer utilized.¹

Beginning with the 2006-7 report, question #6 on the Industry Questionnaire (the dollar value of center-stimulated projects) has been reported based on forced choice categories. This change was made to avoid coding problems and ambiguities raised with open-ended answers. Descriptive statistics for this question are reported three ways: member-level, center-level and IUCRC Program-level. Also, we report an individual-level mean, median, and standard deviation for dollar value for cases reporting at least one project. Because unweighted center means were highly skewed and misleading, individual-level data were used to calculate these statistics.

Faculty Questionnaires

The faculty questionnaire includes two versions: a long version (13 items) that is used by centers in year 1-5 and a short version (6 items) that is used by centers in year 6-10². Since both the faculty long and faculty short questionnaires share some of the same questions, data for these shared questions were pooled for analysis. In the tables below, questions only included in the long version are noted as follows: (L).

¹ The industry questionnaire was revised as of 2006-2007 data collection. *The current industry questionnaire has been significantly shortened (from 44 (L) and 27 (S) to 16 questions).*

² The faculty questionnaire was revised as of 2006-2007 data collection. The primary changes made include: some questions used in past questionnaires were dropped (old version was 29 questions), and two versions of the faculty questionnaire were created.

RESPONSE RATES

Category	Center Level		Individual Level	
	Industry	Faculty	Industry	Faculty
<i>Response Frequency</i>				
Continuing Population from CD report	39	39	743	604
1 st Year Reporting Population from CD report	+5	+5	+35	+28
Retired/Defunct Centers ^a	3	3	26	24
Retired/Defunct Centers Reporting ^b	+2	+1	+6	+8
Phase 3 Centers Reporting	+1	+1	+4	+11
Population ^c	47	46	788	651
Centers Excused from Evaluation ^d	4	4	22	18
Centers that did not return data	0	0	0	0
Available Population ^d	43	42	766	633
Data Received	43	42	325	266
Received / Population	91.5%	91.3%	41.2%	40.9%
Received / Available Population	100%	100%	42.4%	42.0%

- a. This year one center retired more than a year ago reported data. However since they have been out of the program for more than a year, no individual frequencies were available for response rates. This center is included in the “retired/defunct centers reporting” row, but not in the “retired/defunct centers” row.
- b. Retired, defunct, Phase III, and new Centers that are not required to submit data, but some do submit some data. If relevant, those data were included in the analysis.
- c. Population was defined as centers that were at least 1 year old.
- d. Centers were excused for reasons such as being in the midst of center restructuring and respondent refusal to complete surveys.
- e. Numbers based on population minus excused and not returned counts.

Table 2: Benefits

5. During the past year, approximately how many Center-stimulated research projects were supported by your organization (include internal projects and projects contracted to outside performers)? Please estimate the dollar value of all Center-stimulated research projects. Exclude Center membership fee.
